# THE LAST RESORT **RESORT**

### 3 HOTSPOTS TO ESCAPE GLOBAL HEATING

Nuuk, Greenland

While the rest of the world turns into a veritable sauna. Greenland remains a refreshing oaof frosty tranquility. Plus, who wouldn't want to live in a place after a color that's the exact opposite of what you'll be feeling in the rest of the world? Pack your snowshoes and get ready to chill out in stule.

## Reykjavik, Iceland

With its geothermal spas and rugged landscapes, Reykjavik is the ultimate destination for anyone looking to beat the heat. And let's be honest, where else can you swim in a heated pool while surrounded by glaciers? It's like a winter wonderland, minus the winter.

# Dubai,

### United Arah Emirates

Amidst the scorching desert heat, Dubai stands as an oasis of air-conditioned luxuru. With its sprawling malls, indoor ski slopes, and artificial islands. it's the perfect destination for anyone seeking refuge from the sweltering temperatures. In Dubai, you can live, work, and play without ever setting foot outside - talk about a climate-controlled paradise!

# **SMOKY CICADA BITES**

### *Ingredients:*

2 cups of cicadas (freshly harvested from your backyard, extra crunchy!)

A pinch of ash from a nearby wildfire (adds that smoky flavor)

A splash of sweat (your own, of course)

### *Instructions:*

First, make sure your cicadas are thoroughly roasted. You can achieve this by leaving them out in the scorching sun for  $\alpha$  few hours until they reach a crispy golden brown. If you live in an area without cicadas, feel free to substitute with any other locally sourced edible insect - climate change has made them all the rage!

Add a pinch of ash from a nearby wildfire for that extra smoky flavor. Don't worry, the carbon adds a nice earthy undertone that pairs beautifully with the nutty taste of the cicadas.

Finish off your dish with a splash of sweat - after all, what's cooking in a heated world without a little perspiration? Your own sweat adds a personal touch and a hint of saltiness that brings all the flavors together.

Serve your dish with a side of wilted lettuce and a glass of lukewarm water (because who has ice any-

Remember, cooking in a heated world requires a sense of humor and a willingness to adapt!

Bon appétit!
